

2012 Kirkman Medal awarded to Rebecca Stones

Rebecca Stones has broad research interests that extend from combinatorics and graph theory to include search engine algorithms, complex networks, and phylogenetics. She had published 13 papers in mathematics, engineering and bioinformatics journals and one conference paper, and had given 15 conference and workshop presentations. Her nominators describe a researcher who “has obtained strong original results on fundamental problems” and who is “destined for an academic career of distinction”.
