Message from the president .............................................. 1
Medal presentations ...................................................... 2
News of members ........................................................ 3

Conference announcements
Finite Geometry and Friends
(a Brussels summer school on finite geometry) ................. 4
Brussels, Belgium, June 17–21, 2019
9th Slovenian International Conference on Graph Theory (Bled19) 5
Bled, Slovenia, June 23–29, 2019
9th PhD Summer School in Discrete Mathematics ............... 6
Rogla, Slovenia, June 30–July 6, 2019

Reports
4th Istanbul Design Theory Meeting .................................. 8
by S. Küküçifci and S. Yazıcı
GK70: A day of geometry in honor of Gábor Korchmáros .... 10
by M. Buratti
RICAM Workshop on Pseudorandomness and Finite Fields ... 14
by K.-U. Schmidt and A. Winterhof
32nd Midwest Conference on Combinatorics and Combinatorial
Computing ................................................................. 18
by D. Froncek

Recreations
Happy 5B5: Palindromic wishes for the new year ................. 23
by M. Buratti

Refereed contributions
A generalization of magic labeling of two classes of graphs .... 27
by C. Meenakshi and K.M. Kathiresan
All (96, 20, 4) difference sets and related structures .......... 44
by O.A. AbuGhneim, D. Peifer, and K.W. Smith
Bounds for orthogonal arrays with repeated rows ............. 60
by D. Stinson
Greedy triple systems .................................................. 74
by A. Rosa
Notes on spreads of degrees in graphs .............................. 79
by Y. Caro, J. Lauri, and C. Zarb
Two extended Euler functions with applications to latin squares
and bases of finite field extensions ................................. 92
by G. Effinger and G.L. Mullen
