Announcements 1
Message from the president ............................................ 1
Medal Presentations ....................................................... 3
Call for Nominations ..................................................... 4
News of members ......................................................... 6

Biographies 8
In memory of Lorenzo Milazzo, 1963–2019 .......................... 8
by M. Gionfriddo and V. Voloshin

Conference announcements 14
ALCOMA 20: Algebraic Combinatorics and Applications ....... 14
Kloster Banz, Germany, 29 March – 4 April 2020
Combinatorics 2020 ...................................................... 16
Mantua, Italy, 1–5 June 2020
ACCT2020: 17th International Workshop on Algebraic and
Combinatorial Coding Theory ......................................... 18
Albena, Bulgaria, 9–15 June 2020
8th European Congress of Mathematics ............................. 19
Portorož, Slovenia, 5 – 11 July 2020
Combinatorial Designs and Codes ..................................... 22
Rijeka, Croatia, 12 – 17 July 2020

Reports 24
9th PhD Summer School in Discrete Mathematics .............. 24
by A. Hujdurovic
9th Slovenian International Conference on Graph Theory (Bled19) 27
by A. Hujdurovic
14th International Conference on Finite Fields and their Applica-
tions (Fq14) ................................................................. 29
by J. Jedwab
7th Canadian Discrete and Algorithmic Mathematics Conference
(CanaDAM 2019) ......................................................... 32
by J. Jedwab
25th Birthday Celebration: The Electronic Journal of Combin-
atrices ................................................................. 37
by R.A. Brualdi et al.
Refereed contributions

Articles
Cyclic and rotational six-cycle systems ........................................... 41
by M. Meszka and A. Rosa
Decomposition of product graphs into paths and stars with three
edges .................................................................................................. 47
by A.P. Ezhilarasi and A. Muthusamy
On loose 4-cycle decompositions of complete 3-uniform
hypergraphs ....................................................................................... 75
by R.C. Bunge et al.
Some new block designs of dimension three ................................. 85
by C. del Valle and P.J. Dukes
Transitive distance-regular graphs from the unitary groups U(3, 4),
U(4, 3) and U(5, 2) ......................................................................... 103
by A. Švob
